New learning platform for primary school – this is how to log in

We are now launching our new learning platform (Meitner) for primary school. The system is now open and you as a guardian need to log in to get started in communicating with your child's school. From the start of school in August, you as a guardian will use Meitner to receive news, report absences, register care times for after-school care, and follow your child's development at school. What's new is also that you can apply for leave via "Ledighetsansökan" directly in Meitner, if needed.

Log in to Meitner

Please log in via your browser (<https://sso.meitner.se/>) or the app with national registration number and e-ID (BankID). If you do not have a BankID, you can contact your child's school to take part of the information in another way.

Provide your contact details and set preferences

Once you have logged in to Meitner, ensure that we can reach you when needed by:

- Update/Add current email address
- Update/Add your mobile number

When you've accessed the system, you can set up how you want to receive information from the school; e-mail or other manner. This can be done under the heading "Preferenser".

Help and support

Are you in need of help logging in or getting started with the learning platform, you can ask the staff at the school or after-school centre or contact Alvesta municipality's contact centre at 0472-150 00.

On Meitner's support page for guardians, you will find detailed information on how to use the learning platform's features.
